

How to make a festive apple bird feeder

These apple bird feeders not only keep our garden friends happy in the winter months but add a bit of festive colour and decoration outside.

What you'll need:

An apple
Some sunflower seeds (still in their husks)
Some string (suitable for outside use)
A large needle

Instructions

1. Thread a piece of string through the middle of an apple, using a large needle. This will provide a hanger for your bird feeder. (You may need to ask an adult to help with this.)
2. Press sunflower seeds into the flesh of the apple. You may like to make patterns on the apple with the seeds.

3. Hang the apple in a tree, from your windowsill or bird table and watch the birds enjoy it.
